

# HOW TO INSTALL YOUR FLAGS

Please read below carefully before install your flags!

Step 3: Please make sure your pole all the way to the end where the tip should be inside the leather protection pocket.

Step 4: Bind your flag everyday with provided rope to knob tightly enough so the pole won't slide backwards.

Check your flag everyday and make sure the tip of pole is secured inside the leather protection zone.

Step 5: Knock on the stick ONLY, NOT the rotating spindle.

Step 6: Always attach your pole on a spindle for spinning freely in the wind.
