1

Base stand x 1   Wheel holder x 1

STEP 1 #4

Lay down the big round panel on a flat surface with graphic side facing up, #4 bolts screwed into the 4 holes as shown the above image.

STEP 2 #3

Turn the big round panel to facing down, install the *wheel holder* onto the back side of big round panel. Screw #3 bolts into #4, safely secure the big round panel onto the *wheel holder*.
STEP 3 #2

Screw #2 *wing bolts* in the position marked on the image above.

* Note: #2 *wing bolts* are for wheel speed adjustment, **Over-Twist will cause demage**

STEP 4

Insert the Assembled big round panel and wheel holder into the *base stand*, adjust the height and twist the knob tight clockwise to lock up the sections

STEP 5 #5 #7

Insert #5 bolt into the hole with graphic side facing towards you, tighten clockwise.

STEP 6 #6 #7

Secure the prize wheel #1 arrow (place the small panel after the arrow if you have one) with #6 bolt on to the prize wheel, using #7 wrench to tighten #6 bolt clockwise

---

* The #1 arrow must be installed on the prize wheel to avoid potential risk of wheel falling off.

Your Prize Wheel Is Ready to Use!
