

HOW TO USE

LED display panel

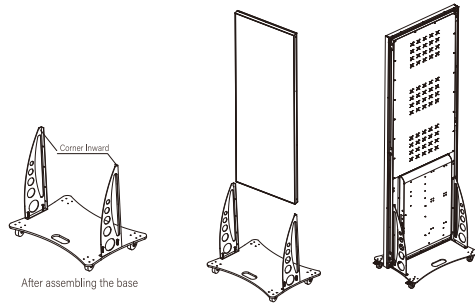

LED Poster Assembly Guide

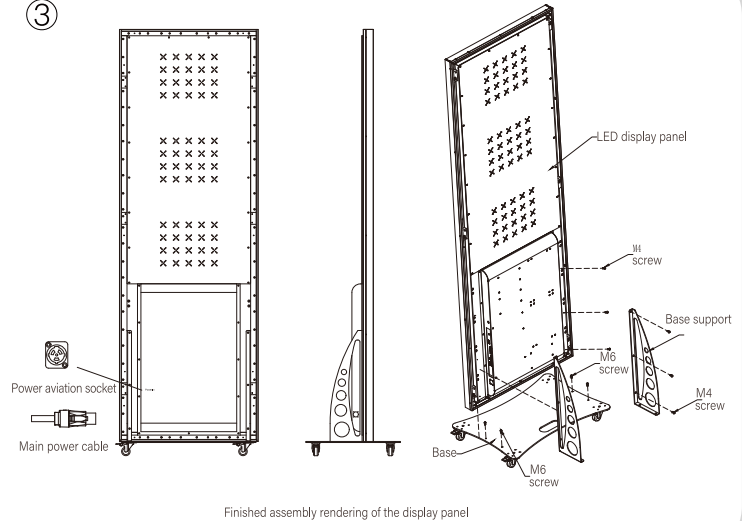

①

②

③

LED Poster screen assembly method:

- As shown in the diagram, first place the base supports vertically on the base.
Fix each support with 2 M6 screws, for a total of 2 base supports.
Note: Ensure the direction of the base supports is correct and not reversed.
- Then place the LED display panel vertically on the base and secure it with 6 M4 screws.
- Insert the main power cable aviation plug (male) into the corresponding aviation socket on the back of the LED display.
The cabinet is labeled with a silkscreen mark "POWER IN" for the power aviation socket.

Steps for using HD Mobile APP

- Search for the "LedArt" App in the App Store and Install It
Open your app store (Google Play Store or Apple App Store).
Search for "LedArt", download and install the app on your mobile device.
- Open the App and Connect to the Device
Open the app and tap "Device" → "Search Device" to locate the corresponding WiFi of the device.
Enter the password "Nsd@123456" to connect.
- Configure the Display Program
Return to the app and tap "Program" to confirm the display screen resolution.
Tap "Create New Program" → "+" to add content, then tap "Send" to upload the program to the device.
